

**FOR IMMEDIATE RELEASE**

**NATIONWIDE BOILER INC. LAUNCHES NEW WEBSITE  
INTEGRATING ALL THREE COMPANY BRANDS**

**Fremont, California, November 8, 2017.....** Nationwide Boiler Inc. recently launched a new, updated and redesigned website, [www.nationwideboiler.com](http://www.nationwideboiler.com). This marks the fifth iteration of the Nationwide Boiler website, originally launched in 1996.

The website has been designed to provide a user-friendly experience with improved navigation, images, and functionality throughout. It integrates all three Nationwide Boiler brands: Nationwide Boiler rentals and sales, Nationwide Environmental Solutions, and the newly acquired Pacific Combustion Engineering / Ponder Burner Company, a division of Nationwide Boiler Inc. In addition, the company has added new information regarding their commitment to safety, multiple storage and maintenance facilities across the United States, and stock of pre-permitted rental boilers for customers in Southern California and the South Coast Air Quality Management District (SCAQMD).

“Our primary objectives for the new site were focused around usability, information and aesthetics. We want our customers to be able to easily find the information they need, with a quick and concise way to contact us when they are ready to obtain pricing details. The new design improves the site’s readability and better reflects our complete line of products and services, especially with our recent addition of Pacific Combustion Engineering / Ponder Burner Company, highlighting their capabilities and expertise,” noted Chelsey Ryker, Marketing Manager at Nationwide Boiler Inc. With a new look and additional information in place, the site also retains significant features from the previous version, including detailed equipment specifications, case studies, product bulletins, Nationwide’s boiler blog, and the ability to view the site in eight different languages.

Nationwide Boiler has provided temporary and permanent steam boiler solutions to large commercial and industrial customers since 1967. The company supplies rental boilers, used boilers, new boilers, and emissions reduction and monitoring equipment. With the recent acquisition of Pacific Combustion Engineering / Ponder Burner Company, their UL certified panel fabrication shop in Washougal, WA provides customers with a strong offering of custom control systems, fuel trains, and other process equipment. Nationwide Boiler's headquarters are in Fremont, CA, with remote offices, representatives, and storage facilities located across North and South America.
